Department of Information Technology (B.Sc.I.T Semester V)
Dot .Net Core and Progressive Web Application Practical
Practical – IV

Roll No.:T045	Name:Omkar Thukarul
Class:TYIT	Batch:1
Date of Assignment: 17-07-2026	Date/Time of Submission: 17-07-2026

Part B - Program

- a) Create an ASP.NET Web Forms application using simple server controls: Design a Student Registration Form using the following ASP.NET controls:
- 1) Label and TextBox to accept Student Name
 - 2) RadioButton to select Gender (Male/Female)
 - 3) DropDownList to select Course (BSc IT, BSc CS, BCA)
 - 4) CheckBox for accepting Terms & Conditions
 - 5) Calendar control to select Date
 - 6) Button control to submit the form
 - 7) Label control to display the output

Algorithm:

- Step 1: Start.
- Step 2: Create an ASP.NET Web Form using server controls.
- Step 3: Place a Label and TextBox to accept the student name.
- Step 4: Add a RadioButtonList to select the student's gender.
- Step 5: Add a DropDownList to select the course.
- Step 6: Insert a Calendar control to select the date.
- Step 7: Add a CheckBox for accepting the terms and conditions.
- Step 8: Place a Button control to submit the form.
- Step 9: Display the entered details using a Label control when the button is clicked.
- Step 10: Stop.

CODE:

aspx:

```
<%@ Page Title="Home Page" Language="C#" MasterPageFile="~/Site.Master" AutoEventWireup="true"
CodeFile="p4-a.aspx.cs" Inherits="p4_a" %>

<asp:Content ID="BodyContent" ContentPlaceHolderID="MainContent" runat="server">
  <asp:Label ID="Label1" runat="server" Text="Student Name:"></asp:Label>
  <asp:TextBox ID="TextBox1" runat="server" OnTextChanged="TextBox1_TextChanged"></asp:TextBox>
  <br />
  <asp:RadioButtonList ID="RadioButtonList1" runat="server">
    <asp:ListItem Value="M">Male</asp:ListItem>
    <asp:ListItem Value="F">Female</asp:ListItem>
    <asp:ListItem Value="O">Other</asp:ListItem>
  </asp:RadioButtonList>
  <br />
  <asp:DropDownList ID="DropDownList1" runat="server">
    <asp:ListItem>Select Course</asp:ListItem>
    <asp:ListItem>Bsc.IT</asp:ListItem>
    <asp:ListItem>Bsc.CS</asp:ListItem>
    <asp:ListItem>Bsc.BAMMC</asp:ListItem>
  </asp:DropDownList>
  <br />
```

Omkar45

```
<asp:Calendar ID="Calendar1" runat="server"></asp:Calendar>
<br />
<asp:CheckBox ID="CheckBox1" runat="server" Text="I accept the terms and conditions" />
<br />
<br />
<asp:Button ID="Button1" runat="server" OnClick="Button1_Click" Text="Submit" />
<br />
<asp:Label ID="Label2" runat="server" Text="Label"></asp:Label>
</asp:Content>
```

aspx.cs:

```
using System;
using System.Web.UI;
public partial class p4_a : Page
{
    protected void Page_Load(object sender, EventArgs e)
    {
    }
    protected void TextBox1_TextChanged(object sender, EventArgs e)
    {
    }
    protected void Button1_Click(object sender, EventArgs e)
    {
        string name = TextBox1.Text;
        string gender = RadioButtonList1.SelectedValue;
        string course = DropDownList1.SelectedItem.Text;
        string date = Calendar1.SelectedDate.ToShortDateString();
        Label2.Text = "Student Name: " + name + "<br/>" + "Gender: " + gender + "<br/>" + "Course: " + course +
"<br/>" + "Date: " + date + "<br/>" + "<br/>" + "Omkar T045 was here";
    }
}
```

Output:

The screenshot displays the web application's output. On the left, the registration form is shown with the following fields and controls:

- Student Name:
- Gender: ☒ Male, ☐ Female, ☐ Other
- Course:
- Calendar: A calendar for July 2026 with the 30th selected.
- Terms and Conditions: ☒ accept the terms and conditions
- Submit:
- Label:

On the right, a separate box shows the output of the Label control after the form is submitted:

OMKAR T045

Student Name: OMKAR
Gender: M
Course: Bsc.IT
Date: 30-06-2026

b) Create a Registration Form to demonstrate the use of various Validation Controls.

Algorithm:

- Step 1: Start.
- Step 2: Create an ASP.NET Web Form.
- Step 3: Place Label and TextBox controls for Name, Age, Password and Confirm Password.
- Step 4: Add a RequiredFieldValidator for the Name field.
- Step 5: Add a RequiredFieldValidator for the Age field.
- Step 6: Add CompareValidator controls to compare the Password and Confirm Password fields.
- Step 7: Enter the required details in the form.
- Step 8: Validate all input fields when the user submits the form.
- Step 9: Display appropriate validation messages if any validation fails.

- Step 10: If all validations are successful, submit the form successfully.
- Step 11: Stop.

CODE:

aspx:

```
<%@ Page Title="Home Page" Language="C#" MasterPageFile="~/Site.Master" AutoEventWireup="true"
CodeFile="p4-b.aspx.cs" Inherits="p4_b" %>
<asp:Content ID="BodyContent" ContentPlaceHolderID="MainContent" runat="server">
    <div>
    <br />
        <asp:Label ID="Label1" runat="server" Text="Name"></asp:Label>
        <asp:TextBox ID="TextBox1" runat="server"></asp:TextBox>
        <asp:RequiredFieldValidator ID="RequiredFieldValidator1" runat="server"
ControlToValidate="TextBox1" ErrorMessage="name should not be empty"></asp:RequiredFieldValidator>
        <br />
        <asp:Label ID="Label2" runat="server" Text="age"></asp:Label>
        <asp:TextBox ID="TextBox2" runat="server"></asp:TextBox>
        <asp:RangeValidator ID="RangeValidator1" runat="server" ControlToValidate="TextBox2"
ErrorMessage="Age should be 18 or 99" MaximumValue="99" MinimumValue="18"></asp:RangeValidator>
        <br />
        <asp:Label ID="Label3" runat="server" Text="Password"></asp:Label>
        <asp:TextBox ID="TextBox3" runat="server" TextMode="Password"></asp:TextBox>
        <br />
        <asp:Label ID="Label4" runat="server" Text="Confirm Password"></asp:Label>
        <asp:TextBox ID="TextBox4" runat="server" TextMode="Password"></asp:TextBox>
        <asp:CompareValidator ID="CompareValidator1" runat="server" ControlToCompare="TextBox3"
ControlToValidate="TextBox4" ErrorMessage="password not match"></asp:CompareValidator>
        <br />
        <asp:Button ID="Button1" runat="server" Text="Submit" />
    </div>
</asp:Content>
```

Output:

The left screenshot shows the web form with the following values: Name: omkar, Age: 21, Password: masked with three dots, Confirm Password: masked with three dots. A 'Submit' button is present, and the message 'Registration successfull' is displayed at the bottom.

The right screenshot shows the form with validation errors: 'Name is Required', 'Age is Required', 'Password is Required', and 'Password is not matching'.

- c) Create a Web Form to demonstrate the AdRotator Control.

Algorithm:

- Step 1: Start.
- Step 2: Create an ASP.NET Web Form.
- Step 3: Create an XML file containing advertisement details such as ImageUrl, NavigateUrl, AlternateText, Height, Width, and Impressions.
- Step 4: Add an AdRotator control to the Web Form.
- Step 5: Set the AdvertisementFile property of the AdRotator control to the XML file.
- Step 6: Run the application.
- Step 7: Display advertisements from the XML file automatically.
- Step 8: Stop.

CODE:

aspx:

```
<%@ Page Title="Home Page" Language="C#" MasterPageFile="~/Site.Master" AutoEventWireup="true"
CodeFile="p4-c.aspx.cs" Inherits="p4_c" %>
<asp:Content ID="BodyContent" ContentPlaceHolderID="MainContent" runat="server">
<div>
    <h2>Advertisement Rotator Demo</h2>
    <asp:AdRotator ID="AdRotator1" runat="server" AdvertisementFile="~/XMLFile.xml" />
    <br />
    <asp:Label ID="lblInfo" runat="server" Text="Click on the advertisement to be redirected to the advertised
site." />
</div>
</asp:Content>
```

XMLFILE.xml:

```
<?xml version="1.0" encoding="utf-8" ?>
<Advertisements>
    <Ad>
        <ImageUrl>Images/sun.jpg</ImageUrl>
        <NavigateUrl>https://www.example.com</NavigateUrl>
        <AlternateText>sunflower</AlternateText>
        <Impressions>20</Impressions>
        <Height>500</Height>
        <Width>500</Width>
    </Ad>
    <Ad>
        <ImageUrl>Images/sun.jpg</ImageUrl>
        <NavigateUrl>https://www.microsoft.com</NavigateUrl>
        <AlternateText>microsoft</AlternateText>
        <Impressions>20</Impressions>
        <Height>500</Height>
        <Width>500</Width>
    </Ad>
</Advertisements>
```

Output:
